Education

Software Developer – OpenClassrooms   *Dec 2018 → May 2020*
javascript, reactjs, css, performance, jquery, bootstrap-4, mysql, api

The project that I'm most proud of is Finn Vs. Fern Game, that I built using vanilla JS. It's a simple turn-based board game for 2 players, with a randomly created map with weapons and obstacles. To create this game I used characters from Adventure Time (a famous CN cartoon).

The second project I'm really proud of is a Restaurant review website, where I used React for the very first time and learned how to use Google API.
